

Be Ready for Day One with Brolly

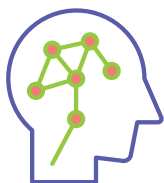

New tools to save your team time and strengthen student outcomes.

GOAL CREATOR

Writing a strong, legally sound IEP goal takes time, and quality can vary from one educator to the next. Brolly's Goal Creator helps by generating research-based SMART goals directly within the platform.

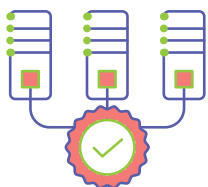

Simply select the subject, grade level, and area of need, and Goal Creator creates a personalized goal tailored to each student's needs, saving time while improving consistency.

AI INSIGHTS

Piecing together a student's progress from assessment scores, trend data, and teacher notes takes time, and it's easy to miss the pattern underneath. AI Insights does that work for you. Available now on the Data Exploration page, one click next to any student's goal progress pulls assessment data, progress trends, and teacher notes into a plain-language summary:

- Trend direction (Improving, Variable, Declining), pace, and the AI's confidence in that read, plus a projected outcome of On Track or At Risk.
- Key Patterns across assessments and Themes from Notes, pulling out strengths, challenges, and environmental factors from teacher documentation.
- Recommendations by category, such as Instructional or Environmental, with concrete next steps for the student.

DOCUMENT STORAGE

Student records shouldn't live across five different systems. With Brolly's Document Storage, IEPs, behavior plans, work samples, assessments, and reference links are stored alongside student services and progress logs, giving your team everything they need in one place to make informed decisions and simplify compliance reporting.

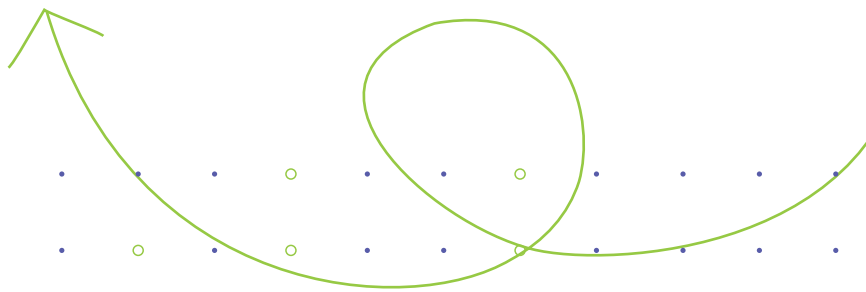

- Upload PDFs, Word Docs, images, and links, or store a full IEP or behavior plan in one place.
- View documents on the data dashboard or directly from the student profile.
- Attach any document to a report with a single click.

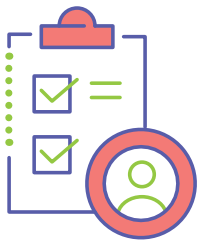

SPANISH TRANSLATION FOR REPORTS

You can now provide Spanish-speaking families with updates on their child's progress without a separate translation process. Just select Spanish as the output language when generating the Progress Monitoring report, right alongside the existing English option.

- All labels, headings, and section titles appear in Spanish, translated and reviewed by a human, not just run through a generic translator.
- Free text like goal descriptions and case notes is translated too, so nothing gets left in English by accident.
- Student names, dates, and numbers stay accurate and untouched, exactly as entered.

PARENT SUMMARIES

Progress reports are full of data parents don't always know how to interpret. Parent Summaries close that gap by letting your team add a plain-language explanation beneath each goal before exporting.

- Add an optional written summary for any goal right in the Progress Monitoring by Goal report builder, with simple formatting (bold, bullet lists) to keep it clear and easy to read.
- Summaries appear in the exported PDF only, positioned directly below that goal's progress data. Nothing changes for reports where you skip this step
- Manage summaries for a student's goals anytime from Manage Students, without building a report first. Add, edit, or delete summaries directly from the Goals widget, and see how many summaries exist for each goal.

NEW SOLUTION! TRACK AND MONITOR 504 PLANS

Are you able to demonstrate that 504 plan accommodations were consistently delivered?

Brolly's new 504 Solution helps close the compliance gap by giving teachers and coordinators a simple, consistent way to document accommodation delivery and monitor student progress. Potential issues become visible early, before they become OCR complaints or legal challenges.
